

All technical data presented represent typical results, unless stated otherwise as min/max values. No guarantee is made that material will meet exactly the values shown.

Stacking Machine

Electrode Stacking Machine for Lithium Ion Batteries or Super Capacitors

- Electrodes and separators in reels are slitted, supplied, and stacked automatically.
- The number of the stacking layers is controlled digitally by a touch panel.
- Electrodes can be pre-punched.
- Speed: example: 2.0 min/cell for a 31-layer cell
- Size: cell-phone size to A4 size

We also have manual stackers available for laboratory use.

Application:

Product type: Machinery

Production scale: Commercial, Pilot
