Calcium Formate

Calcium Formate (SA Grade) Technical Information

Appearance	White, Free Flowing Powder
Purity (Ca(HCOO) ₂)	≥ 98.0%
Total Calcium	≥ 30%
Lead (Pb)	≤ 0.001%
Arsenic (As)	≤ 0.0005%
Loss on Drying	≤ 0.5%

- 
- Used as an additive to grouts and cement for reducing settling time and increasing hardness.
 - Allows for work in freezing temperatures.
 - Inhibits corrosion of metal substrates.
 - Effective in preventing Efflorescence.
 - When used in Gypsum Board, it works as a fire retardant.
